

“Visit at Waste Water Treatment Plant, Lalkhedi, Amravati”

G H Raison College of Engineering & Management, Amravati organised a visit at Waste water treatment plant, Lalkhedi under the subject of Environmental Engineering-II for the Final year students of Civil Engineering. On the site students observed various components of waste water treatment plant like Detritus tank, sedimentation tank, aeration tank, chlorination tank, screening chamber, sludge thickener, etc. Large numbers of students were present for the visit. On the site, Swapnil Kapile sir has given practical information to students & he has also given the information about working of each components parts of treatment plant. The subject teacher, Prof.K.R.Mundane and accompanied faculty, Prof.V.U.Kosamakr were present for visit. The visit was very informative and appreciated by all the students and requested to organise for more such industrial visits.
